Maintenance concept

We will do the job for you!

In close cooperation we develop the optimum maintenance plan for your transmissions/drive systems to ensure maximum system availability.

Our service engineers carry out the maintenance work on site at regular intervals. The activities carried out, any defects found and condition monitoring are recorded and will be provided as a detailed maintenance report.

As part of the maintenance process, we offer the following services:

- Vibration diagnosis - oil analysis
- Hydraulic measurement - oil change
- Wear control - endoscopy

Refurbishment and retrofit

Your drives should be regularly refurbished to ensure high system availability. With an refurbishment by DESCH, we make all our know-how and industry experience from 113 years available to you:

- Disassembly of the gear unit and cleaning
- Expert opinion, surveying, testing and preparation of a detailed test report
- Constructive testing of optimization / modernization
- Spare parts procurement / production of new components
- Assembly using new wear parts (bearings, screws, seals, ...)
- Test run according to defined parameters before delivery
- Recording of the work carried out
- On request mounting and dismounting of the gearbox from the machine - commissioning support

PREDICTIVE MAINTENANCE

OTHER BRANDS

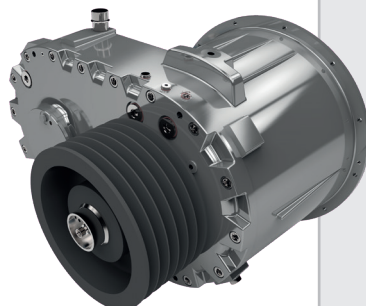

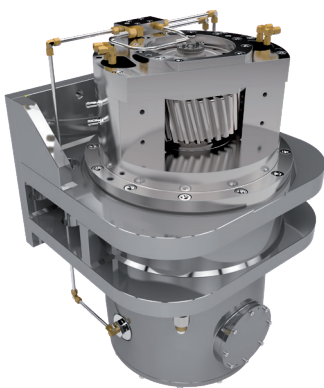

Repairs

Whether at your plant or at DESCH: In case of machine failures, we support you and restore the operational availability of your drive as quickly as possible.

Spare gearbox

We will be happy to check whether your gearbox can be replaced by a corresponding DESCH product from our broad portfolio.

By the use of a gear unit according to the latest technical standards, your machine receives a technical regeneration. By modernizing the components, the service life is considerably extended.
