

DESCH Planetary Gearboxes

PX Series - Intelligent modular system

Gears & Drive Solutions

PX 25 - GB

DESCH Planetary Gearboxes

Type PX Series

DESCH Planetary Gearboxes

With the new PX series, DESCH offers a high-performance range of modular planetary gearboxes that have been specially developed for challenging applications in industrial environments. Based on our flexible standardised and modular system, the gearboxes can be individually adapted to your requirements - for maximum efficiency, durability and reliability.

DESCH System solutions - more than just gearboxes

- **Gearbox + Clutch + Brake + Motor**
Perfectly matched, both mechanically and in terms of control technology - directly from DESCH.
- **Smart monitoring with DESCHcontrol.M**
Permanent condition monitoring of your drives in real time - for maximum system availability and predictive maintenance.
- **Torque measurement with DESCHtorque**
Precise control of your processes thanks to integrated sensors - ideal for critical applications.
- **System-based drive solutions**
Whether electric or hydraulic - we supply complete drive packages including monitoring, cooling and lubrication.
- **Engineering support included**
Our experts support you from design to commissioning - worldwide.

Your advantage: a single point of contact, shorter project lead times, no interface problems - and a solution that works.

DESCH - your partner for integrated drive systems.

DESCH Planetary Gearboxes

Type PX Series

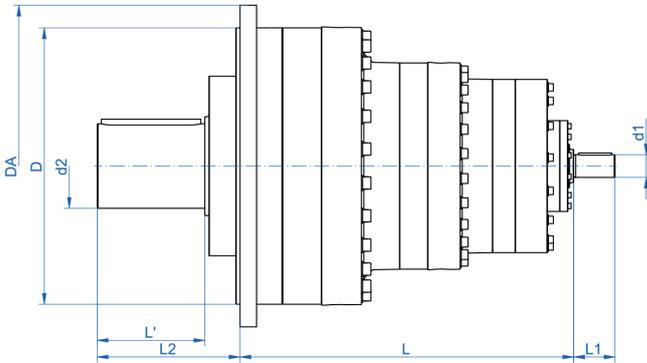

Your benefits at a glance:

- **Modular and flexible:** 19 sizes with a wide range of output and drive variants - can be combined with bevel gearboxes or spur gearboxes.
- **High power density:** Torques from 1,000 Nm to 1,000,000 Nm in the standard range - larger designs available on request.
- **Optimised adaptation:** Brakes, clutches or electric motors - seamless integration into your system.
- **Full control:** Can be integrated as an option - **DESCHcontrol.M** for condition monitoring and **DESCHtorque** for precise torque measurement.
- **Efficient lubrication:** Optionally supplied oil lubrication systems ensure long-lasting and low-maintenance operation.
- **Made in Germany:** Development, production and assembly from a single source - for the highest quality standards and short delivery times.

Whether press drives, conveyor technology, recycling, mining, winches or special machine construction - the PX series stands for innovative drive solutions that will help you move forward in the long term.

All modules can be combined and are supplied as a pre-assembled system on request. Reduce interfaces and speed up your project time.
